

GAPs / Priorities

Need for harmonization
+ scales
+ the values (soil
water...)

Harmonization
or Integration?

① Integrated management of
+ compartment
management (inter connected)

Land use type and
provision in providing
ESS

Integrate soil heterogeneity
in spatial context.

Threat to ecosystems
Risk -

Dilemma = growing
biomass vs. organic C
in soil (binding, structure)

How can we
manage urban
areas in a
sustainable way?

Gap for policy
tools to choose
use of soil?

Already exist in
UK.

Do you know how do we
manage with all
cost? NL case -

For NKS (SRA implementation)
need for them to
understand the themes
and integration.

Scheme for better
presentation of themes

Need for examples -
about pb we want to
solve -
case study / pilot
example -

General
